Aliant Battery participates in AGRITECHNICA 2025: Advanced solutions for agricultural electrification

Imola, Thursday, October 9th, 2025 | Aliant Battery, a brand of ELSA Solutions SpA, is pleased to announce its participation as an exhibitor at the 2025 edition of AGRITECHNICA, the leading international event dedicated to technologies for the agricultural sector. The event will be held in Hanover, Germany, from November 9 to 15, 2025, offering a unique showcase for the latest innovations in the electrification of machinery and vehicles dedicated to this ever-changing market.

Aliant Battery will be present in Hall 17, Stand A43, where visitors will be able to discover cutting-edge solutions in the field of custom Lithium Iron Phosphate (LFP) batteries, designed for modern and sustainable agriculture. Aliant batteries stand out for their reliability, high performance, interoperability, and ability to meet certifications where required by the specific application.

Thanks to its ongoing commitment to research and development and investment in innovative technologies, Aliant Battery is positioned as a key partner for OEMs and operators in the agricultural sector seeking tailor-made solutions for energy transition, emissions reduction, and operational efficiency.

"Participating in AGRITECHNICA 2025 represents a strategic opportunity for us to strengthen our presence in the agricultural sector and share our vision of a more sustainable and electrified future," said Davide Dal Pozzo, CEO of ELSA Solutions SpA. "We are excited to present our latest innovations and engage with key market players. Aliant Battery is ready to lead the transformation of the agricultural sector with cutting-edge technologies and specialist expertise."
