## **BAUMA 2025 | Aliant Battery celebrates successful participation**

**Imola, april 15<sup>th</sup> 2025** | ELSA Solutions S.p.A., through its Aliant Battery brand, would like to thank all those who contributed to the great success of its participation in BAUMA 2025, the world's leading trade fair for construction machinery, building materials and mining equipment, held in Munich from April 7-13, 2025.

During the event, Aliant's dedicated exhibition area established itself as a dynamic and exciting meeting point for numerous visitors, partners, and customers from around the world. The interest shown in customized Lithium Iron Phosphate (LFP) batteries designed for the electrification of industrial vehicles and machinery exceeded all expectations, confirming the importance of reliable, high-performance, and sustainable solutions in the heavy-duty vehicle sector.

"Participating at BAUMA 2025 was an exceptional experience. We had the opportunity to establish new relationships, strengthen existing collaborations and gather innovative ideas that will guide our future technological developments. We sincerely thank all the customers, partners and professionals who visited our booth and helped make this event a memorable one. It was great to see the strong commitment of our sales team - Federico, Riccardo and Maurizio - and the enthusiasm with which they presented our lithium battery solutions to new potential customers," said Davide dal Pozzo, CEO of ELSA Solutions S.p.A.

The outcome of this BAUMA 2025 is an incentive for us to continue to innovate with the goal of providing flexible and customized energy storage solutions with excellent technologies for an increasingly energy-efficient and sustainable future.
