Aliant Battery will participate in IVT Expo 2025: Innovation in Industrial Electrification

Imola, april 29th 2025 | Aliant Battery, a brand of ELSA Solutions SpA, is pleased to announce its participation as an exhibitor at the 2025 edition of IVT Expo, the leading event dedicated to technologies and components for industrial and off-highway vehicles. The event will be held in Cologne, Germany, on June 11th and 12th, 2025, offering a unique platform to present the latest innovations in the field of industrial electrification.

Aliant Battery will be present in Hall 4.1, Booth 1005, where visitors can discover some of the most advanced solutions in the field of customized Lithium Iron Phosphate (LFP) batteries for the electrification of vehicles and industrial machinery. With a special focus on heavy-duty applications, Aliant batteries are characterized by reliability, high performance and interoperability, meeting the growing demands for energy efficiency, emissions reduction and certifications.

Through continuous R&D efforts and strategic investments in the latest technologies, Aliant Battery is able to meet the challenges of a rapidly evolving industry by providing customized solutions to OEMs and industry partners worldwide.

Participation in IVT Expo 2025 represents a key opportunity for us to consolidate our role as a leading Reality in the development and production of customized batteries for industrial automotive and special applications," said Davide Dal Pozzo, CEO of ELSA Solutions SpA. "We are excited to present our latest technological innovations and to engage with key players in the industry. The future of the industry is electric, and Aliant Battery is ready to lead this transformation with cutting-edge solutions and knowledgeable staff."
